☆ milliondox.in/ invite — Registeration ī googlee not active.

— This takes me to login page.

↳ Back arrow on login page is not working.

✳

This can be made bold and underlined.

☆

why are we getting this ad?

☆ Role management — we should not make employee picture mandate.

— why is the admin able to set member's password. Admin should have the right to manage their ID but not create a pswd. member should be able to create their own pswd.

— Also password should be made visible with 'eye button' on all

login / password pages.

- email ID (personal) should not be
a mandatory requirement.
